PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of hands-on experience building scalable, high-performance React.js web applications and cross-platform mobile apps with React Native. Skilled in React Hooks, component design patterns, state management with Redux Toolkit, and client-side routing with React Router and React Navigation. Experienced integrating RESTful APIs with Axios, building validated forms with React Hook Form, Yup, and Zod, and using Vite and Expo for modern, optimized build tooling. Proven track record delivering production-ready web and mobile platforms across e-commerce, logistics, and academic domains, from prototype through deployment.

TECHNICAL SKILLS

Frontend (Web): React.js (Hooks, Component Design Patterns, Performance Optimization), Redux Toolkit, React Router v6, React Hook Form, Yup, Zod, Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap

Mobile (React Native): React Native, Expo, Expo Router, EAS Build, React Navigation, TanStack Query, AsyncStorage, React Native Reanimated, Firebase, Push Notifications, Xcode

Backend: Node.js, Express.js, Python, RESTful API Design

Databases: MongoDB, PostgreSQL, MySQL, Sequelize

Build Tools & DevOps: Vite, Axios, Git, GitHub, Docker, AWS (S3, EC2, RDS), Postman, Linux

AI Development Tools: Claude, Codex, ChatGPT, Gemini, Antigravity, Cursor, Claude Design

Practices: RESTful APIs, Clean Code, Debugging, SEO, Performance Optimization

PROFESSIONAL EXPERIENCE

Full Stack Developer | Futric

Nov 2025 – Present

- Build and maintain full-stack web and mobile applications using React.js, React Native, React Hooks, and modern JavaScript frameworks.
- Developed the SAWA web application (sawa.xapis.com) using React.js and Redux Toolkit for state management.
- Developed a separate SAWA mobile application for iOS and Android using React Native, Expo, and React Navigation, sharing business logic with the web platform.
- Develop scalable backend services and RESTful APIs powering client platforms, including SAWA and Dliv (dliv.me).
- Integrate web and mobile applications with backend APIs using Axios, and implement validated forms with React Hook Form, Yup, and Zod.

AI Prompt Engineer | Optimiza — Amman, Jordan

Jul 2024 – Nov 2025

- Designed, developed, and tested complex prompts to optimize AI model performance for production use.
- Refactored AI-generated code to improve performance, readability, and maintainability.

Frontend Developer | Glyphsmarketing — Georgia, USA (Remote)

Oct 2023 – May 2024

- Built visually appealing, responsive web applications with React.js, including Arab Georgia (arab-georgia.com), a platform connecting Arab communities across the US.
- Transformed design prototypes into functional, optimized code using component design patterns and implemented new features.
- Used Vite as the build tool to speed up local development and optimize production bundles.

Full Stack Developer | The Larn Book Gate — Amman, Jordan

Mar 2023 – Oct 2023

- Built dynamic, responsive UIs with React.js, React Hooks, and RESTful APIs using Node.js/Express.js for thelearnbook.com, an academic portal hosting thousands of books and journals.
- Implemented client-side routing with React Router and form handling with React Hook Form for user-facing workflows.
- Designed and optimized relational and NoSQL databases for scalability.

EDUCATION

Balqa' Applied University — Salt, Jordan

Sep 2022

Bachelor of Cybersecurity — GPA 2.8

Advanced Software Development in Full-Stack — Training Program, June 2022

LANGUAGES

Arabic — Native | English — Professional Working Proficiency
